

# Reliable IT Solutions for Mission Readiness

Agile IT solutions for federal excellence, enhancing functionality, efficiency, security, and compliance.

Akima Secure Technologies (AST) provides agile, innovative, and trusted information technology solutions to the federal government and federal integrator community. Our capabilities allow customers to implement and evolve IT infrastructures to achieve, maintain and advance functionality, efficiency, security, and compliance.

## Our Capabilities

### Enterprise IT

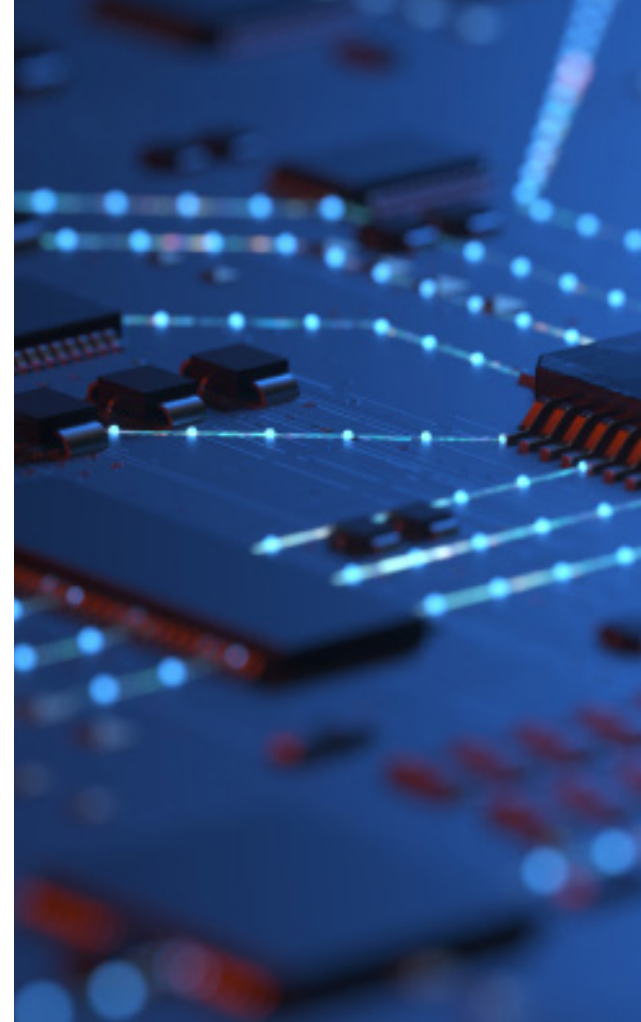

We provide essential capabilities that meet critical federal IT needs. Our expertise includes rapid procurement and delivery of hardware and software, ensuring timely deployment to support mission-critical operations. We offer Tier 1 and Tier 2 desktop support services, delivering responsive assistance to optimize user productivity. We excel in Risk Management Framework (RMF) and Authorization to Operate (ATO) engineering and documentation support, ensuring robust security compliance for federal systems. Moreover, our experts support in database architecture, engineering, and administration, enabling efficient data management solutions tailored to enhance operational effectiveness and security across federal agencies.

### Network & Infrastructure Services

We specialize in facilitating critical capabilities for multi-site data center deployments of servers, storage, and network equipment, ensuring seamless integration across diverse locations. Our expertise extends to customized and integrated site deployment of network, desktop, and audiovisual capabilities, optimizing operational efficiency. We excel in storage systems deployment and management, ensuring reliable data storage solutions tailored to meet organizational needs. Additionally, our cloud engineering and migration services enable smooth transitions and enhanced scalability for federal agencies, supporting their evolving IT requirements effectively.
