Past Performance

Center for Preparedness and Response (CPR) Information Resources Office (IRO) IT Support Services:

Delivered full-lifecycle IT support, including SOA development, user-centered design, secure database architecture, and System Assessment & Authorization (SA&A). Implemented high-impact FISMA controls under the Enterprise Master System Security Plan (EMSSP) and led cyber resiliency operations, IoT integration, and Governance, Risk, and Compliance (GRC) initiatives (ATO, COOP). Provided ISSO support for infrastructure hardening, security protocol development, and compliance enforcement, with enterprise program management ensuring seamless execution and risk mitigation.

CDC Division of Global Migration and Health (DGMH) DGMQ Informatics Support: Supporting the improvement and modernization of the DGMH IT/informatics portfolio of 14 systems and databases, including the CDC. AWS Cloud Supports Cybersecurity Solutions for Infrastructure and Data Warehouse Services, configuration management, access control, and data encryption. This includes continuously auditing AWS environments with certifications from accreditation bodies across geographies and verticals. Infrastructure Security, Vulnerability Management. Disaster Recovery/Continuity of Service. Enterprise Program Management.

Why Tanaq: ANC 8(a) Team You Can Trust
