- 541510 Computer Systems Design and Related Services
- 423430 Computer and Computer Peripheral Equipment and Software Merchant Wholesalers
- 334220 Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing

Client Stories

National Law Firm [Confidential | Available for Reference Upon Request] *Secure Interoperability*

International law firm located in New York City, Miami, Chicago, and Salt Lake City. As a target for hostile foreign governments and terrorist organizations, we treat privacy protection (e.g., anonymization) of our clients with utmost importance. Ongoing services include ensuring that all hardware and software are seamlessly integrated while maintaining the critical privacy and security standards their clients require. To bring them into compliance with PCI, HIPAA, and SOC2, we conducted web application scanning and gray box penetration testing to provide the necessary remediation steps. Changes are implemented as a phased rollout to avoid disruption, and we continue to conduct penetration testing, vulnerability scanning, and spot testing.

Development Authority of the North Country (“DANC”) *Cost Overrun Avoidance*

Telecom services throughout the Adirondack region. Working with our engineers and the OEMs, we ensure the final POs that the client submits for approval are the best possible configurations for their unique needs—and that all parts and subscriptions being ordered are necessary and match the chassis they are buying for.

Smart + Strong *Workflow Optimization*

Publisher of health-related titles (POZ, Cancer Health, Hep). When their workforce went fully remote, we secured their AWS platform and aided in the transition from a VPN-based solution to a 100% cloud presence. Services include ongoing maintenance and building and maintaining their AWS public-facing and in-house.
