CORPORATE EXPERIENCE

Veteran Benefits Administration (VBA) Benefits Data Quality (BDQ)

- ★ Implemented data quality program to enhance data management and data governance to improve data quality across the enterprise and within authoritative VA data sources.
- ★ Adjudicate more than 432,000 data errors annually, improving VA systems and service to Veterans.
- ★ Led VBA's Data Governance to support Data Governance Councils, establish data operating models, and implemented best practices to promote business integration.

Veterans Health Administration (VHA) Procurement & Logistics Office (P&LO)

- ★ Provide supply chain expertise and support across the department and applicable directorates to achieve the desired end state of supply chain operations and transformation actions.
- ★ Provide subject matter expertise, data management and strategy, strategic communication and management, industry engagement, stakeholder analyses, market research, and roadmap development.
- ★ Utilize advanced statistical methods and data analysis for MSPV utilization, VHA purchase card spend, and vendor price analysis to optimize vendor management, reduce operational costs, and enhance efficiency.

Veterans Affairs Business Intelligence Services Line (BISL) Support Services

- ★ Architect, implement, and maintain ETL scripts for CDW data domains, and develop, implement, and maintain a SSAS enterprise architecture and a Pyramid Analytics enterprise architecture and dashboard.
- ★ Provide support for CDW data mart project, Windows system administration, Suicide Prevention, Community Care, database administration, Business Intelligence (BI) project management, ATO Service, and Enterprise Geospatial support services.

Veterans Affairs (VA) Data Migration Data Syndication (DMDS)

- ★ Support the Business Intelligence Service Line in complex enterprise, health related data migration and data syndication for multi-directional (e.g., identity, health, benefits, finance) to assist the VA in the current Electronic Health Record Modernization (EHRM) migrating data from VistA to Cerner Millennium HealthIntent.
- ★ Syndicate data from Cerner to VistA to support continuity of VHA reporting, analytics, and decision support.

Federal Emergency Management Agency (FEMA) Applicant Case Tracker (FAC-TRAX) System Enhancements and Sustainment Support

- ★ Support State, Local, Territorial, and Tribal (SLTT) governments and communities to verify eligibility for disaster grants.
- ★ Implemented a modernized cloud architecture to include Infrastructure as Code (IaC) and Configuration as Code (CaC) to take full advantage of modern software tools and information technology.
- ★ Established Agile, DevSecOps, and Continuous Integration and Continuous Deployment (CI/CD) Agile methodologies to make FAC-TRAX highly available, reliable, rapidly adaptive, efficiently scalable, and responsive in rapidly delivering capabilities to support Public Assistance grants management for SLTT affected by disasters.
- ★ Host and manage cloud-native development, test, and production environments enabling release on demand capabilities.

FEMA Recovery Technology Programs Division (RTPD) National Emergency Management Information System (NEMIS) Individual Assistance (IA)

- ★ Support American citizens following disaster declarations in time of need verifying identity and eligibility for disaster related grants to support temporary housing, home inspections/repairs, transportation, moving and storage, personal property, and healthcare and burial services.
- ★ Provide system development, integration, modernization, and O&M for NEMIS-IA through Lean-Agile and DevSecOps.
- ★ Provide a full spectrum of systems integration with 18 applications ensuring ongoing reliability, security, and performance of their software, platforms, and IT infrastructure (hybrid architecture cloud and on-prem).
