### SECURE NETWORKS

Cisco, GPON & Optical LAN, Alarmed Carrier PDS, and software monitoring.

### UNIFIED COLLABORATION

Voice, video, and data interoperability, VTC, A/V, conference, and more.

## WHAT WE DO

3T Innovations is a provider that is strategically focused on integrating new technology to meet the operational demands of our customers. Diminishing budgets and a rise in operational and security vulnerabilities make the need for combining technologies to create systems that are streamlined, secure and efficient more necessary than ever. Our team aligns solutions that meet and exceed these challenges and restraints to ensure modern, turn key solutions that require minimal oversight or expenditure from our customer to manage. We have a unique ability of reducing the footprint and size of server architecture and infrastructure while strengthening the overall capabilities of the enterprise.
