Our Customers Say it Best:

W911KB20D0005 TO for Remedial Investigation and Risk Assessment at Multiple Sites, Eielson AFB, AK: QUALITY—EXCEPTIONAL
 "Document quality was excellent for such a large document. Project was initially moving at a quick pace and the contractor did a great job delivering quality documents. This was largely due to proactive planning and meetings." ~ *Scott Kendall, Environmental Engineering Supervisor USACE, POA 12/9/22 CPAR*

89243521AFE000001 for DOE Environmental Remediation/Waste Management Services, Former Naval Petroleum Reserve No. 1, Elk Hills, CA: MANAGEMENT—EXCEPTIONAL - Paragon is managing the remediation work in an exceptional manner and has been instrumental in developing and facilitating remediation plans that will reduce the overall cost of closing the sites. Paragon's management and facilitation with regards to planning toward development of a corrective action management unit that consolidates arsenic-impacted soils on-site rather than disposal off-site will save approximately \$10M. Paragon's facilitation and management of the changes required for using commercial/industrial closure standards will have significant impact on the overall costs and time required to close the sites. ~ *Mary Roark, Contracting Officer, DOE, Strategic Petroleum Reserve*
