Audio Visual/IT equipment sales, design, integration and support for the government and corporate clients.

With over 25 years of experience in dealing with federal acquisition regulations Conliff is uniquely qualified to service Federal Government contracts. Along with the Small Minority Owned (8a) designation Conliff also carries the certification of being Service Disabled Veteran Owned allowing government agencies to sole source their Audio Visual Needs. Conliff maintains employees that carry Top Secrete clearances and is extremely knowledgeable in secure communication standards and locations.

Conliff also serves the corporate world with exceptional design, integration and service of all types of conference rooms, conference centers, video wall displays, digital signage and classrooms.

As Audio and Visual devices become more networked based Conliff delivers seamless integration of systems to the customers network and security staffs, with past IT network experience our engineers are constantly training on new standards and addressing security concerns.

Conliff Solutions can service systems as small as one room all the way up to an entire buildings and campuses to ensure system wide functionality and monitoring.

We are one of the few AV companies that utilize true source code repository control to ensure that your unique code is always accurate and up to date. This is important as the code written for our clients is a key portion of our services and a product that the customer keeps after delivery to ensure they have uncompiled code for future changes.

Conliff is also unique in its ownership as most company CEO's are from a sales background our CEO has been an IT director and an AV Senior Engineer and Certified control systems programmer for all major manufacturers so you can be sure that our company is driven to ensure that all systems are functionally correct when they leave our warehouse and our timetables for delivery and installation are based on real world experience and knowledge.
