- Small Business Designations
  - SBA Certified 8(a)
  - EDWOSB
  - WOSB
  - MBE
  - DBE
  - GSA MAS: 47QRAA23D001T
- GSA OASIS+ WOSB Contract #47QRCA24DW095
- GSA OASIS+ 8(a) Contract #47QRCA25DA038
- GSA OASIS+ SB Contract #47QRCA25DS067
- DUNS: 080632903
- UEI: LNLHZN19C96
- CAGE Code: 7UPQ9
- SeaPort-NxG N0017825D7316

## QUALS &

## ACCOMPLISHMENTS

- Personnel Certifications: PMP, CISSP, CEH, OSCP, OSCE, OSWE, A+, Network+, Server+, Security+, GSNA, GNFA, GPEN, GCWN, GPPA, GCIA, GCIH, GCFA, GSEC, GCCC, GMON, GICSP, COMSEC, CCMC
- ENDICTUS is NIST 800-171, CMMC Level 2.0, ISO 27001 & ISO 9001 certified
- Rapidly Achieved Numerous ATOs, IATTs, and Conditional ATOs for Army INSCOM and NSA
- Successfully accredited and integrated a Cross Domain Solution (CDS) with NCDSMO
- Successfully accredited and integrated diode solutions for Army INSCOM
- Data Management and Consultation services to nationwide cyber programs for:
  - Several US Army Commands
  - AO of the US Courts
  - Washington Headquarters Service (WHS)
  - Pentagon Force Protection Agency (PFPA)
- Coordinate and oversee the implementation of Government 1st mile network circuits
- Manage deployments and accreditation of numerous cyber capabilities for US Army

## CORPORATE OVERVIEW

### CORE COMPETENCIES

ENDICTUS Corp (ENDICTUS) was founded in 2017 out of a desire to bring capable, yet highly nimble consulting services and transformational products to the Department of Defense (DoD), the Intelligence Community (IC), and other government customers.

This core commitment to readiness and responsiveness resulted in continual and steady customer-driven growth to bring the ENDICTUS brand of service to other areas of support beyond the original requirements of our customers. This allowed ENDICTUS to grow expertise in emerging technologies and threat reduction initiatives to offer services across 4 core competencies: Open-Source Intelligence (OSINT) / Privacy, Cybersecurity, Information Technology (IT) Modernization, and Professional Services.

ENDICTUS is mission focused, and it was a customer that defined ENDICTUS' as its organization's "mission enablers". This is the slogan that defines our approach and exceptional solutions.

We leverage the domain knowledge and technical experience of our ex-uniformed, subject matter experts and the decades of specialized experience from our industry specialists, to deliver customer first and operationally stable solutions to the DoD and Intelligence Communities across our 4 core competencies.

ENDICTUS is an Authorized Reseller of DeleteMe, Optery (Data Broker Redaction), Signal, Skopenow, ZeroFOX, FlashPoint (OSINT/PAI), ShadowView (Mobile Telemetry), Garrison (CDS), Authentic8's Silo (Private Browsing), Exodus Intelligence (Vulnerability Research/Exploits), and Outsystems (Low Code/No Code).

### EXPERT SERVICES

#### OSINT / Privacy

- Threat Intelligence
- Publicly Available Information (PAI)
- Discovery Open-Source Information
- Executive / Privacy Management
- PII Redaction
- Law Enforcement Support
- MISO / MILDE

#### Cybersecurity

- Engineering Services
- Capability Development, Testing & Integration
- Computer Network Operations (CNO)
- Managed Attribution
- Vulnerability Assessments / Pentesting
- Cross Domain Solutions (CDS)
- RMF - IA, A&A, ATO

#### IT Modernization

- Cloud Services
- Data Analytics Automation
- Business Apps Development
- Low Code / No Code / Traditional Development
- API Integration
- Information Technology Services

#### Professional Services

- Technical Consulting
- Business/Program/Mgmt Analysis
- Strategic Planning/Management
- Process Mapping & Improvement
- PMO Support
- Character & Leadership Development
- Acquisition & Requirements

## ENDICTUS OSINT/PRIVACY CAPABILITIES

### THREAT INTELLIGENCE

Endictus excels in providing comprehensive threat intelligence services. With a dedicated team of cybersecurity experts, Endictus leverages advanced data analytics, machine learning, and real-time monitoring to identify and mitigate potential threats. Their proactive approach enables organizations to stay ahead of cyber adversaries by offering actionable insights and strategic recommendations. By continuously analyzing threat landscapes and identifying emerging risks, Endictus helps clients protect their critical assets, enhance their security posture, and ensure business continuity. The firm's expertise and commitment to safeguarding digital environments make it an invaluable partner in today's ever-evolving threat landscape.

### OPEN SOURCE INTELLIGENCE (OSINT)

Endictus excels in delivering comprehensive open source intelligence (OSINT) services. Leveraging sophisticated data gathering techniques and advanced analytics, Endictus can uncover valuable insights from publicly accessible sources such as social media, online forums, public records, dark web, and public records. Our OSINT expertise enables our clients to assimilate troves of open source data as consolidated, actionable intelligence with speed, precision, and accuracy. By turning vast amounts of unstructured data into actionable intelligence, Endictus helps clients make informed decisions, mitigate risks, and operate efficiently.

### PII REDACTION

Endictus can play a pivotal role in helping your organization remove sensitive Personally Identifiable Information (PII) from the internet. Equipped with cutting-edge tools and expertise, Endictus can identify, track down, and remove personal information in both publicly exposed and difficult to reach areas of the Internet. We leverage advanced techniques such as OSINT platforms, investigative tools, and takedown requests to ensure that private data is identified and effectively scrubbed from public access. By providing comprehensive data protection services, Endictus helps our clients mitigate the risks of identity theft, financial fraud, and risks to the personal safety of themselves and their families.

### MISO / MILDEC

Endictus offers support to Military Information Support Operations (MISO) and Military Deception (MILDEC) support to enhance strategic communication and operational security. Our team's expertise enables crafting and dissemination of tailored information to influence target audiences' perceptions and behaviors, aligning with mission objectives. We employ sophisticated techniques to create credible narratives that deceive adversaries and protect friendly operations. By integrating intelligence insights and advanced psychological tactics, Endictus ensures that their MISO and MILDEC initiatives effectively shape the operational environment, contributing to mission success while safeguarding personnel and assets.

### PAI DISCOVERY

Endictus is a leader in publicly available information (PAI) discovery, empowering clients with critical insights drawn from a vast array of indexed, deep web, and dark web sources. Utilizing tools and processes developed in house for clients with critical data privacy risks, Endictus can efficiently locate and analyze pertinent data from websites, social media, public records, and other accessible databases. This enables clients to gain a comprehensive understanding of their digital footprint, monitor exposure, and identify potential threats. Our expertise ensures that all gathered information is relevant, accurate, and actionable, providing clients with a significant advantage in making informed risk management decisions and maintaining a proactive stance in managing their data exposure.

### EXECUTIVE / PRIVACY MANAGEMENT

Endictus stands at the forefront of executive protection against online threats, ensuring the highest level of data privacy and cybersecurity for its clients. Leveraging cutting-edge technology and a team of skilled professionals trained on military cyber operations, we implement comprehensive cyber security practices to safeguard the executive's data, assets, and household against cyber threats. By combining our knowledge of targeted cyber operations with cyber security engineering proficiency, Endictus implements a tailored protection solution that mitigates risks and protects against breaches, enabling executives and their families to operate confidently and securely in the digital realm.

### LAW ENFORCEMENT SUPPORT

Endictus can significantly enhance a law enforcement agency's capabilities by providing skilled staff with expertise in areas such as business analytics, cybersecurity, intelligence, and data analysis. These professionals bring cutting-edge knowledge and skills to the agency, enabling more efficient handling of digital evidence, better protection against cyber threats, and improved data-driven decision-making. By leveraging the technical proficiency of the Endictus staff, many of whom are former law enforcement professionals, your agency can stay ahead of technological advancements and ensure its operations are both secure and efficient. This collaboration not only strengthens the agency's investigative capabilities but also contributes to overall public safety.

## ENDICTUS CYBERSECURITY CAPABILITIES

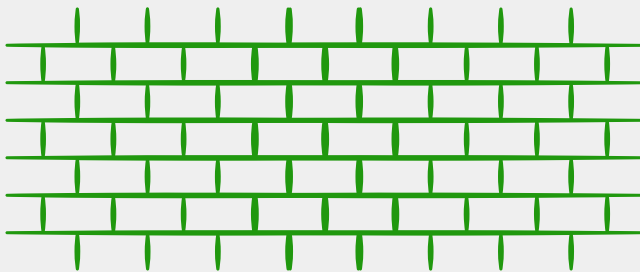

### CYBERSECURITY ENGINEERING

ENDICTUS delivers cybersecurity engineering subject matter expertise, honed by years of supporting national security customers operating in high threat environments with evolving cyber threats. Our services include comprehensive risk assessments, security architecture design, security control implementation, and continuous monitoring. We ensure that our clients remain not only compliant with government standards but also fortified against sophisticated cyber-attacks, ensuring the integrity, confidentiality, and availability of their critical data.

### VULNERABILITY ASSESSMENTS / PENETRATION TESTING

The ENDICTUS team simulates real-world cyber-attacks to identify potential vulnerabilities in your systems, networks, and applications. Our team is trained on real world experience conducting critical computer network operations and brings this tradecraft to our penetration and vulnerability assessment practice.

### MANAGED ATTRIBUTION

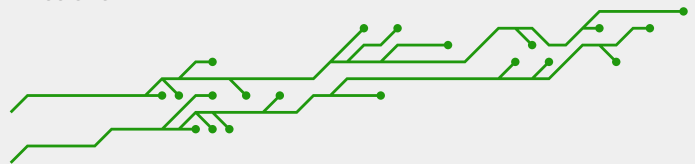

ENDICTUS offers specialized services to design, build, and operate managed attribution and non-attributable capabilities. Our subject matter experts ensure that clients can navigate the digital landscape with anonymity and security. We ensure not only protection to sensitive operations but also allows for safe exploration and interaction within potentially hostile cyber environments.

### COMPUTER NETWORK OPERATIONS (CNO)

We specialize in being "mission enablers", bringing our expertise to your operators to ensure your missions are executed safely, effectively, and on schedule. Through years of hands-on-keyboard experience, our team has resolved challenges with infrastructures, guards, network/application tunnels, c2 frameworks, and other temperamental capabilities. We bring these solutions to your team to elevate your proficiency and enable your mission.

### CAPABILITY DEVELOPMENT, TESTING & INTEGRATION

ENDICTUS offers products and services that enable success at all capability delivery phases. We offer catalogs of previously undisclosed capabilities as well as original research services, enabling access to hardened targets. Endictus testing support ensures your capabilities operate as designed in real world scenarios. Our development team will ensure that the capabilities are integrated into your operational platforms, enabling immediate use in missions.

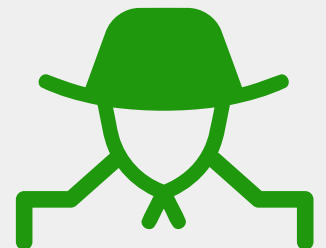

### CROSS DOMAIN SOLUTIONS (CDS)

ENDICTUS has the skills and past performance to resolve the most demanding CDS challenges, including applying transfer and access CDS products in national security environments. We have constructed custom diode solutions, system architectures that enabled real-time missions across domains, navigated the NCDSMO approval process, passed site-based security assessment (SBSA), achieved authorizations to operate (ATO), and optimized the end user experiences to ensure our solution was both secure and mission-enabling.

### RMF - IA, A&A, ATOS

The ENDICTUS team has years hands-on experience achieving full authorizations to operate (ATO) in the most challenging environments, including implementing high impact level controls, intelligence overlays, and multiple CDS overlays.

## ENDICTUS IT MODERNIZATION CAPABILITIES

### DATA ANALYTICS

ENDICTUS provides advanced data analytic services, turning raw data into actionable intelligence. Their team of experienced analysts and computer scientists leverage industry standard tools and techniques to process and interpret complex data sets.

By employing statistical models, machine learning algorithms, and data visualization, ENDICTUS helps clients uncover hidden patterns, trends, and correlations. This empowers organizations to make data-driven decisions, optimize operations, and predict future outcomes with greater accuracy.

### BUSINESS APPS - LOW/NO CODE DEVELOPMENT

Our software development team holds expertise across a broad spectrum of specializations, from traditional business application development to advanced cybersecurity and hyper-efficient low/no code projects. By harnessing our expertise in cybersecurity and OSINT/privacy, we design, build, test, and maintain secure applications within our state-of-the-art in-house environments. This ensures robust, reliable, and tailored solutions that meet our clients' diverse needs.

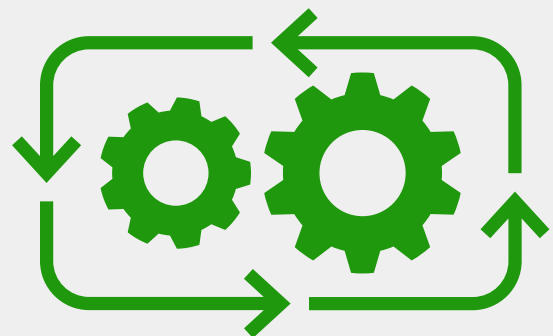

### CLOUD SERVICES

With expertise in cloud architecture, migration, and management, ENDICTUS ensures seamless transition and integration of business operations to cloud platforms. Our services include setting up scalable and secure cloud infrastructures, optimizing cloud performance, and leveraging cloud hosted services to minimize the demands of your on-prem infrastructure. Our team of cloud experts leverages the latest technologies and best practices to enhance data availability, ensure robust security, and improve overall business agility. By partnering with us, your organizations can unlock the full potential of the cloud, driving innovation and achieving strategic goals with confidence.

### AUTOMATION

Reduce costs and accelerate your processes with targeted automation provided by our IT modernization team. We can identify your organization's repeatable tasks which are subject to error and inefficiency. We are skilled on implementing a variety of products and use cases to amplify the productivity of your team.

### API INTEGRATION

Whether you need to design and implement a custom API or integrate your platform with external API service, Endictus has provided these services for the most demanding mission-facing environments. We understand the complex needs of bespoke national security projects and have served as an integrator for projects with numerous disparate vendors/products, even integrating with transfer cross domain systems (CDS).

### INFORMATION TECHNOLOGY SERVICES

ENDICTUS delivers top-notch services ranging from network management and cybersecurity to cloud computing and software development. We ensure seamless IT infrastructure, robust security measures, and efficient system operations. By leveraging our experience of being mission enablers for the most demanding technology systems, ENDICTUS helps organizations enhance their IT capabilities, improve productivity, and achieve their strategic goals.

Our commitment to excellence and client satisfaction makes us a trusted partner in the evolving landscape of information technology.

## ENDICTUS PROFESSIONAL SERVICES CAPABILITIES

### PROGRAM SUPPORT

We provide comprehensive administrative and coordination support services to enhance operational efficiency for our clients. Our team manages communication channels to connect inquiries with the appropriate teams or external organizations. We support research tasks by extracting relevant information from a variety of resources. As part of our services, we serve as a primary point of contact for our clients, supporting external customers and ensuring timely follow-up for any outstanding issues. Our services are designed to streamline workflows, improve communication, and provide reliable administrative support across various organizational functions.

### STRATEGIC PLANNING/MANAGEMENT

The ENDICTUS team provides skilled staff to support strategic planning and management operations, ensuring that organizations have the expertise and talent to achieve their goals. Our team of highly trained consultants brings a wealth of experience in strategic analysis, market research, and project management. Through a blend of innovative thinking and practical solutions, the Endictus team enables mission success, driving sustained growth and competitive advantage for their clients.

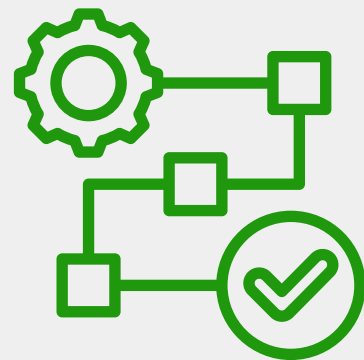

### ACQUISITION & LOGISTICS

By integrating seamlessly with the client's operations, the ENDICTUS team works diligently to streamline customer supply chain and procurement processes by increasing efficiency, reducing costs, and mitigating risks associated with acquisitions and logistics. Our strategic approach and comprehensive understanding of the industry enable success of our client's mission to achieve smooth and effective procurement cycles.

### PMO SUPPORT

The ENDICTUS team of experienced project managers and consultants brings a wealth of knowledge in best practices, methodologies, and tools for efficiently operating a program management office (PMO). We offer comprehensive services, including project planning, resource allocation, risk management, and performance tracking. Our PMO support enables your mission success by driving continuous improvement, enabling clients to achieve their objectives with precision and confidence.

### PROCESS MAPPING & IMPROVEMENT

ENDICTUS assists organizations in process mapping and improvement by providing a systematic approach to identifying, analyzing, and enhancing business processes. Their team of experienced consultants collaborates closely with clients to understand their unique workflows and objectives. Utilizing advanced process mapping techniques, Endictus visually represents the current state of operations, pinpointing bottlenecks, inefficiencies, and areas for improvement. They then devise strategic plans to streamline processes, optimize resource allocation, and enhance overall productivity. By implementing these tailored solutions, Endictus helps organizations achieve greater efficiency, reduce costs, and improve their operational performance, ensuring sustainable growth and competitive advantage.

### TECHNICAL CONSULTING

Our technical team is available to enable successful execution of your most technical requirements and missions. Endictus combines deep technical knowledge with industry best practices to provide innovative, reliable, and secure solutions across all of our competencies. Our support will elevate the technical abilities of your program.
