Spotlight Location

Facilities Maintenance Services (FMS) Consolidated Facilities Maintenance (CFM) - Harry S. Truman Building (HST)

Under this DOS FMS CFM task order contract, Tatitlek's sister subsidiary, TTI, provides all management, administration, supervision, labor, subcontractors, materials, supplies, equipment, and reimbursable building alterations to plan, schedule, coordinate, and assure effective performance of all O&M services at DOS Headquarters, the **Harry S. Truman (HST) Building**. HST is a 2.6M sq. ft. office complex located at 2201 C St NW, Washington, DC 20520.

TTI has designated office and storage spaces within HST including a 1,662 square foot (SF) office space, a 3,540 SF office/storage space for custodial services, and a 9,625 SF room utilized as a general office/storage area. The core working hours at the HST Building are from 6:00 a.m. to 6:00 p.m., Monday through Friday (excluding holidays). The labor categories performing work under this contract include:

- Quality Control/ Safety Inspector
- CMMS Specialist
- CMMS Analyst
- Technical Writer III
- General Clerk III (Service Call/Maximo)
- Chief Engineer
- Lead HVAC Mechanic
- Mechanical Supervisor
- Electrical Lead
- Electrical Planner/Estimator
- General Planner/Estimator
- Third Class Lead Engineer
- First Class Engineer
- Third Class Engineer
- Journeymen Pipefitter
- Journeymen HVAC Mechanic
- Lead Plumber
- Journeymen Plumber
- Master Electrician
- Journey Electrician
- Pneumatic/Electronic Controls Technician
- Master HVAC Mechanic
- Maintenance Mechanic
- Utility Maintenance Mechanic
- Maintenance Trades Helper

TTI's personnel receives and responds to service calls from building tenants and DOS personnel for issues pertaining to plumbing, mechanical, electrical, building system, architectural/structural, environmental, safety, or other related maintenance issues. We perform repairs to building equipment and systems required to prevent a breakdown or failure of building equipment or systems; or to put said building equipment or systems back into service after a detected breakdown or failure.
