Past Performance

- **State of Maryland (Prime):** Support the State of Maryland Department of Health data marts and related systems including AWS cloud platform management, data management, data architecture, data analytics, data science, quality assurance, software development, and platform innovation.
- **U.S. Department of Agriculture (Prime):** Provide an online proctoring solution including program management, proctoring, and dashboard creation to the Food Safety and Inspection Service.
- **U.S. Department of Agriculture (Prime):** Provided fleet charge card program management and oversight support to the Office of Property and Environmental Management.
- **U.S. Department of Agriculture (Prime):** Provided SAFe Agile training and Program Increment (PI) planning assistance to the Digital Infrastructure Services Center (DISC).
- **U.S. Department of Treasury (Prime):** Supported the Fiscal Service with financial management data analytics and reporting using data from Salesforce and other systems.
- **U.S. Department of Agriculture (Prime):** Provided advisory support to the Office of the Chief Information Officer at Food Safety and Inspection Service in their Enterprise Data Warehouse (EDW) modernization initiative. Formulated a roadmap for incorporating EDW into the Enterprise Data Analytics Platform & Toolset (EDAPT) environment and offered program management services.
- **U.S. Department of Agriculture (Sub):** Supported Risk Management Agency to modernize its data warehouse and migrate data to a Cloudera data lake in the EDAPT environment on AWS.
- **Universal Service Administrative Company (Sub):** Provided application development for the USAC Affordable Connectivity Program and National Verifier Application Enhancement.
- **U.S. Department of Agriculture (Sub):** Created executive dashboards and reports for five branches in the Client Experience Center within the USDA Office of Chief Information Officer using Microsoft Power BI. Also served as Microsoft Project Server SME.
- **DC Government (Sub):** Provided data governance, data quality, system integration, process improvement, and program management for the Comprehensive Child Welfare Information System (CCWIS) implementation. Worked with 40+ offices to meet data requirements from Children’s Bureau, Administration for Children and Families, U.S. Department of Health & Human Services.
