

IT/OT Consulting • Technology Solutions • IT/OT Managed Services

Mavros is a technology company specializing in creating and implementing technical solutions for cloud computing, enterprise systems, and operational technology. Our primary goal is to improve critical infrastructure capabilities and provide effective services to commercial and government clients. We prioritize the security of systems to ensure uninterrupted availability. Our services cover operational technology and managed IT services, including robust security measures and comprehensive Microsoft 365 solutions. Our extensive expertise allows us to adapt to various systems and take pride in designing innovative solutions that seamlessly integrate with our client’s existing technology.

Mavros focuses on forward-thinking strategies in infrastructure and security, catering to sectors such as energy, water, health, and banking at local and federal government levels. Our exceptional data loss prevention strategies guarantee the safety, security, and constant accessibility of our client’s data, offering them peace of mind. By continuously redefining service standards, Mavros remains at the forefront of cloud and on-premise solutions and goes above and beyond for our clients.

IT Managed Services • Technology Security • Data Governance

Mavros is a technology company specializing in delivering an array of services encompassing technology security, technology-managed services, data governance, and compliance, tailored to meet the stringent demands of banks and financial institutions.

Our offerings are designed to seamlessly integrate with both cloud and on-premise infrastructures, ensuring an adaptable and secure technological environment. With a partnership with companies like Microsoft and Dell, and a reseller alliance with TD SYNEX, Mavros leverages the backing of these institutions to further a reliable and compliant operational environment. Our complete technology-managed services are engineered to improve efficiency, reduce risks, and support the stringent regulatory compliance mandates prevalent in the financial sector.

By benefiting from our capability in data management and governance, we enable our financial clients to use their data's potential responsibly and efficiently. Our persistent commitment to technology security emphasizes our endeavors, providing a reinforced protection against growing cyber threats. Through a combination of innovative technology and strategic alliances, Mavros stands as a new n propelling financial institutions towards a secure, compliant, and technically active future.

CORE CAPABILITIES for Financial and Banking Institutions

Integrated IT Consulting Services for Banking:

- System Engineering for resilient, optimized Banking IT infrastructure.
- Project Management for successful technology outcomes.
- IT Integration and Technical Planning for streamlined operations.

Mavros' Cybersecurity for Banking:

- Data Loss Prevention (DLP) to safeguard financial data.
- Incident Response and Recovery for swift operations resumption.
- Compliance and Auditing for regulatory adherence including PCI-DSS compliance.
- Security Training to foster a security-centric culture for finance.

Mavros Managed IT Services:

- System Monitoring for operational integrity.
- Data & Backup Management for financial data preservation.
- Cloud Service Management for optimized resources.
- Technical Support for round-the-clock assistance.
- IT Systems Administration for streamlined operations.
- Vulnerability and Patching for security upkeep.

Mavros' Cloud and On-Premise Technology Solutions:

- Cloud Expertise on platforms like Azure & AWS for Banks.
- Microsoft 365 Implementation for collaboration.
- PowerBI Data Analytics for informed decision-making.
- Custom Application Development for tailored solutions.
- B2C and B2B implementation for Banks and its Customers
