

# MISSION SUPPORT

Optimizing Your Operations to Accelerate Performance.

Competitive Range Solutions (CRS) is a trusted partner in delivering value added analysis and decision support to Contracting Officers, Program Managers, and stakeholders. We employ highly qualified industry veterans with acute domain expertise resulting in timely, cost-effective work product, and best value outcomes. Our professionals thrive in complex acquisition and program environments partnering with value added echo system partners and our customers to solve tough problems and drive an unparalleled level of professionalism and results.

**Our mission support services focus on three primary areas: acquisition support, program management support, and operations enablement.**

## ► ACQUISITION SUPPORT

Our acquisition advisory support is centered on industry best practices including the Defense Acquisition Workforce Improvement Act. We partner with contracting officers and program managers supporting requirement development and delivery management, pre to post award.

Our NCMA and DAWIA certified professionals can help you navigate through complicated federal acquisition policy, guidance, and regulations. This support includes but is not limited to:

- Acquisition Strategy and Planning
- Integrated Master Schedule Development and Management
- DoD 5000-series Documentation Preparation
- Requirements Management
- Source Selection Support Services
- Contract Administration
- Risk Management
- Budget/Economic Analysis/OMB-300/Clinger-Cohen
- Develop acquisition schedules and project plans
- Conduct market research
- Create source selection plans
- Define evaluation criteria and create evaluation reports
- Offer best value recommendations
- Request contract modifications or period of performance extensions
- Close out contracts and grants
- Prepare final modifications and establish final indirect rates

*We look at a variety of factors that affect your agency – from the technical to the cultural – to find the tools and approaches with the greatest impact.*

## ► PROGRAM MANAGEMENT

Our CRS project and program managers become your dedicated partners, providing exceptional customer support to ensure your projects are completed on-time, on-schedule, and within budget. Comprised of PMI PMP certified professionals, our team is able to guide you on management of commercial programs, as well as complicated government projects. We can optimize your project or program from planning to execution to ensure outputs are in line with your mission and objectives. This includes:

- DoD 5000-series Documentation Preparation
- Integrated Master Schedule Development and Management
- Budget Support
- Economic Analysis/OMB-300/Clinger-Cohen
- Business case analysis
- Financial management
- Earned value management (EVM)
- Performance metrics
- Systems engineering
- Enterprise architecture design
- Reports, analysis and technical studies

## ► OPERATIONS SUPPORT

Increasingly, our customers are faced with tight budgets and exhausted resources, yet still need to maintain mission-critical performance and fulfill business objectives. Our team has specialized experience in numerous industries, including healthcare, defense, science and technology. We offer operational support services that include but are not limited to:

- Administrative Support
- Visual Communications
- Public Outreach
- Document Management
- And More...

# TECHNOLOGY SOLUTIONS

We help you focus on running your business, not your technology.

As the speed of business accelerates and technology evolves to keep pace, organizations require expert lifecycle support that is reliable, knowledgeable and efficient. Our expertise in planning, developing, deploying and maintaining IT solutions spans the IT System Management lifecycle. We provide key architectural vision that drives critical mission capability while engineering complex solutions and delivering with capacity and impact. Our dedication to quality outcomes with a best value approach will always deliver the best solution, right on target.

Let Competitive Range Solutions (CRS) ease the burden of deploying and operating your technology.

## ► SOLUTIONS ARCHITECTURE SUPPORT

CRS can help you define your needs, provide a flexible infrastructure design and implement your solution. Our IT Systems Engineering best practices approach will ensure your requirements are met and you are satisfied with your IT outcomes. We are leaders in advanced IT engineering architecture and provide insightful direction to our customers on how to best leverage existing and future technologies. We offer systems solutions that include:

- IT Architecture and Security Policy
- Service Creation Approaches
- Virtualized Data Centers
- Cloud Infrastructure Services
- Network (Routing, Switching, LAN, WAN, Data Network)
- Unified Communications & Collaboration
- Desktop, Mobile & Ubiquitous Computing

## ► INFRASTRUCTURE SUPPORT

CRS understands how important the efficient use of your IT systems are to your day-to-day operations. We pride ourselves on providing mission critical, best-in-class IT support services. Our goal is to make sure your essential IT systems deliver services in a continuous flow. Our diverse pool of certified IT professionals can help you leverage IT monitoring, management and support services to shift your IT model from reactive to proactive, and stay one step ahead of IT problems. Our ITIL V3 compliant Service Desk model offers Tier 1, 2 and 3 support, tailored to your specific needs, including:

- Incident and service request management
- ITSM Support for fixed, mobile and enterprise IT assets
- Resolution of incidents and service requests as quickly as possible
- Service asset and configuration management, knowledge management and change management

## ► VALUE ADDED TECHNOLOGY SUPPLIER

CRS knows how to support initial and continuing procurement of IT technology for your organization. We are a commercial and government presence Value Added Reseller with a Dun & Bradstreet Open Rating score of over 97%. That means you can count on excellence when including new or complex technology for your infrastructure projects or just lifecycle maintenance. We pride ourselves on fast, efficient acquisition at the best price points available to the industry. CRS can provide technology from most Original Equipment Manufacturers in the areas of Unified Communications, Network Infrastructure, Data Center, Software, Storage and Security through a wide network of global distribution partners with favorable financing options.

- GWAC VAR Presence
- Multiple Distribution Partners
- Equipment, Software, Cloud and Security Services
