

# ARTICUS SOLUTIONS

A Chenega company

*"Where Small Business and Big Ideas Meet"*

## SERVICES & SOLUTIONS

### Systems Engineering

- SAFe Agile Management
- Automation Expertise
- Requirements Analysis
- CDS Integration
- AI/ML Integration
- Mission Planning Systems
- Interoperability and Security
- Geographically Dispersed Stakeholders
- Integration Strategy
- System Architecture and Adaptability
- Government Rights & Security

### Intelligence & Law Enforcement Support

- Media Destruction Support Services
- Document Analyst Support Services

### Program Management

- Program Planning and Coordination
- Stakeholder Engagement
- Monitoring and Evaluation
- Risk Management

**ARTICUS SOLUTIONS, LLC** is an 8(a), Small Disadvantaged Business (SDB) and wholly owned subsidiary of Chenega Corporation, an Alaska Native Corporation (ANC).

Articus empowers our clients to achieve mission success through innovative, value-added, and process-driven solutions. By integrating enterprise-wide business practices, advanced technologies, and deep technical expertise, we deliver critical services that drive performance and resilience. As a premier provider of systems engineering, intelligence & law enforcement support, program management, and a variety of staffing services, we offer both the scale and agility needed for today's dynamic federal environment. Our ability to lead and support remote, geographically dispersed teams is backed by a consistent track record of delivering localized services with globally proven resources.

We integrate enterprise-wide practices, advanced technologies, and deep technical expertise to provide critical services that enhance performance and resilience. Our expertise includes Systems Engineering Services (scalable and agile); managing complex software development (Scaled Agile Framework methodologies), advancing AI/ML strategies for federal and defense needs, and integrating Commercial Off-the-Shelf (COTS), Free and Open-Source Software (FOSS), and Government Off-the-Shelf (GOTS) technologies for optimal functionality and security.

We deliver enhanced service delivery, measurable performance, and operational efficiency, ensuring strategic value for stakeholders and consistently exceeding client expectations. The Articus DCGS Systems Engineering Support (SES) Team drives innovation and strengthens cybersecurity within the Air Force Distributed Common Ground System (AF DCGS) using cutting-edge technologies like Artificial Intelligence/Machine Language (AI/ML).

## THE ARTICUS ADVANTAGE

### 8(a) ANC Cost Savings

- ✓ Eligible for 8(a) sole source contracting cost-saving measures via an 8(a) ANC direct award, up to \$100M for DoD

### Cleared Experts

- ✓ Articus has staff averaging 15 years of experience in sensitive positions, having successfully completed various levels of background investigations. Surge staffing available CONUS and OCONUS.

### Rapid Value Creation

- ✓ Purchase power through GSA MAS and back-end business systems/workflows, ISO 9001: 2015 certified
- ✓ Chenega Corporation meets CUI protection requirements as specified by NIST SP 800-171 and DFARS 252.204-7012, with assessments conducted at the High Confidence Level under the DCMA DIBCAC's Joint Surveillance Assessment (JSVA) program

## AGENCY EXPERIENCE

- ✓ DOD
- ✓ USAF
- ✓ DOJ/FBI
- ✓ USAID
- ✓ DOE

## PAST PERFORMANCE EXAMPLES

### SYSTEMS ENGINEERING

- Articus revolutionized mission-critical operations for the **US Air Force Distributed Common Ground System (DCGS)**, delivering DevSecOps-driven software engineering and integration across 11 systems engineers. We designed, developed, and tested IMINT/GEOINT baselines, achieving 100% on-schedule delivery to the DCGS Software Integration Lab (DSIL) and multiple operational sites. Our agile transition to Open Architecture (OA) frameworks, coupled with zero-trust cybersecurity protocols, reduced system vulnerabilities and ensured seamless multi-platform integration for mission readiness.

### INTELLIGENCE AND LAW ENFORCEMENT SUPPORT

- Articus provides high-quality mission-critical support services to the FBI, ensuring compliance with federal regulations and enhancing the Bureau's operational and forensic capabilities:
  - Media Destruction Support Services (MDSS)** by managing the logistics of receipts, processing, and shipping of media items. This includes ensuring 100% accountability for all received items and memory component disposal.
  - Document Analyst Support Services (DASS)** services providing experienced Document Analyst personnel to assist forensic examiners (FEs) in various tasks, such as shredded document reconstruction, questioned document examinations, footwear/tire examinations, and training and program development.

### PROGRAM MANAGEMENT

- Supporting USAID and other Federal Agencies with hundreds of staff, Articus has provided Program Management by focusing on the following key areas:
  - Project Planning and Coordination:** Develop comprehensive project plans that include timelines, milestones, and resource allocation. This ensures successful execution and alignment with project goals.
  - Stakeholder Engagement:** Facilitate effective communication and collaboration among stakeholders, including government representatives, Articus team members, and other partners. This ensures that all parties are informed and engaged throughout the project lifecycle.
  - Monitoring and Evaluation:** Implement robust monitoring and evaluation frameworks to track project progress, measure outcomes, and identify areas for improvement. This ensures that project objectives are met and impact is maximized.
  - Risk Management:** Identify potential risks and develop mitigation strategies to address challenges proactively. This ensures that projects remain on track and within scope, budget, and timeline constraints.
