SarelaTech Capabilities and Past Performance

SarelaTech specializes in delivering comprehensive IT and cybersecurity solutions with a proven track record supporting Federal and Defense clients. Our expertise spans cybersecurity operations, IT service management, cloud engineering, program/project management, and software engineering, ensuring mission-critical systems remain secure, efficient, and compliant.

Key Past Performance Highlights

Defense Enterprise Office Solutions (DEOS) – O&M Task Order

- Customer: GDIT / Defense Information Systems Agency
- Contract Value: \$3M
- Performance Period: August 2023 – Present
- Scope: Comprehensive cybersecurity and ITSM for DEOS, supporting over 1.5 million DoD users across unclassified and classified environments. Delivered Risk Management Framework (RMF) compliance, Tier III incident response, proactive cyber threat hunting, and configuration/change management.

DEOS – Secure Cloud Tenant Readiness and Standup Task Order

- Customer: GDIT / Defense Information Systems Agency
- Contract Value: \$551K
- Performance Period: January 2022 – August 2024
- Scope: Supported the establishment of a secure Microsoft 365 IL6 tenant on SIPRNet. Delivered system security planning, RMF compliance, Authority to Operate (ATO) documentation, and penetration testing. Developed key security tools and ensured ongoing monitoring and compliance.

DISA Enterprise Storage Services II

- Customer: Defense Engineering, Inc. / WWT / Defense Information Systems Agency
- Contract Value: \$725K
- Performance Period: March 2020 – September 2021
- Scope: Provided critical security engineering and RMF support for DISA's Cloud Storage milDrive (Storage-as-a-Service) system, performing 100% of all security-related and Assessment and Authorization (A&A) activities. Our team served as the ISSO and ISSE, delivering security management, engineering, and documentation development to ensure milDrive's compliance with DoD 8510.01 standards.

DISA SE3 Service Life Cycle Support

- Customer: Soliel / Defense Information Systems Agency
- Contract Value: \$120K
- Performance Period: September 2019 – March 2020
- Scope: Provided project management and test engineering for multiple DISA programs, including Storage-as-a-Service, Enterprise Messaging, and SKIWeb. Developed test frameworks, conducted over 42 test events, and implemented maintenance processes to ensure security and functionality.

Why SarelaTech?

With deep expertise in secure and classified environments, SarelaTech consistently delivers innovative, secure, and scalable solutions tailored to Federal and Defense missions. Our commitment to excellence, compliance, and operational integrity ensures we exceed expectations while safeguarding critical systems and data.
