### Business Information

- Structure: Corporation
- UEI #YUXRNXBQKKQ4
- CAGE code: 76AA8
- Facility Clearance: Secret
- ISO 9001:2015
- ISO 27001:2022

### Contract Vehicles

- SBA Certified 8(a)
- GSA MAS
- SeaPort NxG
- 8(a) STARS III
- FAA eFAST

### NAICS Codes

- 541512, 541330, 541511, 541611, 541513, 541519

### GSA MAS SINS

- 54151S, 54151HEAL, 54151HACS

### Corporate Overview

**cyDaptiv Solutions, Inc.** is a mission-driven IT and cybersecurity company helping federal agencies protect their systems, data, and operations. We bring a flexible, hands-on approach and a proven record of delivering results in enterprise environments—from healthcare and defense to global military operations.

We support a wide range of federal programs with expertise in cybersecurity compliance, system modernization, and secure IT operations. Our team excels at navigating complex environments, whether on-premises or in the cloud, and uses automation to streamline tasks like system hardening, patching, and security monitoring—so agencies can focus on their mission with confidence.

#### Our primary objective is our customer's success

- Our **Customer Centric** approach focuses our team on partnering with our customers to solve complex IT and Cyber challenges.
- We run a **lean organization**, investing in our team and technology to keep costs low and deliver **best value** to our customers.
- We are **structured for growth and agility** to support our customers' evolving challenges and opportunities.

### Core Capabilities

#### Risk Management and Compliance

- Deliver end-to-end RMF, FedRAMP, and CCRI support for IT, OT, and medical systems.
- Perform automated/manual scans, develop A&A documentation, and manage POA&Ms via eMASS and Xacta 360.
- Provide continuous monitoring of security controls, configurations, and risk across evolving environments.
- Support cybersecurity governance, policy development, and readiness assessments for standards compliance.

#### Cybersecurity

- Design and implement cybersecurity solutions for hybrid, on-premises, and cloud environments.
- Lead vulnerability assessments, patch management, and remediation planning to reduce risk exposure.
- Deliver real-time threat detection and continuous monitoring using ACAS, SCAP, and STIG tools.
- Protect sensitive data through privacy assessments (PIAs/SORNs) and secure handling of PII and PHI.

#### DevOps, DevSecOps, and CI/CD

- Build secure, automated DevSecOps pipelines to accelerate development and deployment.
- Integrate security testing and compliance checks into CI/CD workflows.
- Automate configuration management and STIG compliance using Ansible and infrastructure as code.
- Support cloud migration and modernization initiatives with scalable, high-availability solutions.

#### Information Technology Services

- Provide expert systems, network, and database engineering across classified and unclassified domains.
- Deliver responsive IT support, desktop management, and enterprise infrastructure services.
- Manage vulnerability remediation, patch cycles, and system hardening across platforms.
- Scale delivery teams quickly through cleared staff augmentation and global surge support.

## Defense Health / US Army Core of Engineers

**Rhine Ordnance Barracks Medical Center (ROBMC), Landstuhl, Germany**  
**Brian D. Allgood Army Community Hospital (BDAACH), Camp Humphreys, South Korea**  
**William Beaumont Army Medical Center (WBAMC) Replacement Hospital, Ft Bliss, Texas**  
**Walter Reed National Military Medical Center (WRNMMC), Bethesda, Maryland**  
**General Leonard Wood Army Community Hospital (GLWCH), Ft Leonard Wood, Missouri**  
**Veterans Affairs (VA) El Paso Health Care Center, Ft Bliss, Texas**

- Assessment and Authorization (A&A) support for over 300+ systems ranging from complex security management systems to high-end medical devices, facility related control systems (FRCS) and closed-network platform IT systems across major hospital projects.
- Documentation development for each Authorization Package including network boundary diagrams, PPSM, HW/SW inventories, Categorization memos, Privacy Assessment, POA&Ms, Security Plans, and all other Defense Health Agency (DHA) required artifacts.
- Cybersecurity Project Management using agile methodologies to efficiently manage the work activities of the cybersecurity engineers, analysts, vendors, and local Information Management staff.
- Coordination of the A&A process via eMASS and direct interactions with the DHA Authorizing Officials.
- IT Support activities include Database Administration support, Systems and Network Administration, and Helpdesk/Desktop Support.

## Navy

**Sasebo Smart Grid Project, US Fleet Activities Sasebo, Japan**

- Support the end-to-end DoD RMF Assessment and Authorization (A&A) of the Facility Related Control Systems (FRCS), building automation system, and closed network platform IT systems for approximately 32 buildings.

**Pacific Missile Range Facility (PMRF), Barking Sands, Kauai, Hawaii**

- Performing Systems Engineering, Systems Administration, and Vulnerability Assessment and Remediation for a broad range of systems and technologies including nearly 200 Windows, 200 Linux, and 100 network devices.

**NAVSUP Business Systems Center, Mechanicsburg, PA**

- Oracle Fusion Middleware Administration, Cloud Migration, DevOps, STIG review and remediation automation (Ansible), Solution Engineering and Process Management and Improvement.

## DEPARTMENT OF INTERIOR (DOI)

**Washington D.C. / Reston, VA / Lakewood, Colorado**

- Information Management and Assurance Program Support (IMAPS) support includes risk management and information system security continuous monitoring, POA&M management, and Information Systems Security Officer (ISSO) support, and Privacy assessments.
- Assessment includes approximately 150 security boundaries to include FedRAMP cloud hosted applications and 20+ FedRAMP Cloud Service Provider boundaries and offers services.
