

Capability Statement

We like tech. We're obsessed with it actually. So how can we help you fulfill your mission?

OTOT develops emerging technology solutions. We introduce federal agencies to tomorrow's tools and techniques. And we know federal IT well enough to properly integrate data across legacy systems and leading-edge platforms alike.

Core Service Offerings

Digital Modernization:

We're technologists through and through.

OTOT elevates tech solutions with a tailored approach. What does that mean for you? No downtime when we begin working together because we are platform-agnostic and flexible across all the tools your workforce counts on.

SERVICE OFFERINGS

- Software Testing and IV&V
- Robotic Process Automation (RPA)
- ServiceNow Development
- Appian Development
- Web and Mobile Application Development

Digital Transformation:

Technology doesn't wear a tie.

We're committed to innovation in the federal domain. OTOT is the entrepreneurial partner who invests in your long-term vision, armed with the transformational technology to help you reach your mission objectives.

SERVICE OFFERINGS

- DevSecOps and Agile Transformation
- Data Analytics and Business Intelligence
- Health Informatics
- Business Process Re-engineering

Digital Strategy:

We build for outcomes, not accolades.

Our method is to develop a roadmap early, prototype quickly, and iterate often. We do so with genuine enthusiasm for the challenge, because we love to see how the right tech solution helps people achieve their mission objectives.

SERVICE OFFERINGS

- Artificial Intelligence (AI)
- Digital Product Roadmap Development
- Digital Innovation
- Data Governance

IDENTITY

As in “Oh-Tot.” Since 2016, we’ve worked in federal health IT and digital informatics, adhering to a no-nonsense approach of solving complex business challenges. OTOT is an 8(a) small business that fosters community among its personnel, which in turn makes us a reliable business partner. OTOT people are driven to be better than conventional IT expectations. We do not want to be another IT company. We want to be the people you rely on and the reason you succeed.

ROBOTIC PROCESS AUTOMATION

OTOT uses RPA with intelligent automation in a variety of domains:

1. Electronic health record test and evaluation
2. Health informatics involving electronic health record processing
3. Asset management for tracking, reporting, and audit readiness
4. Document recognition, reading, and information extraction

CONTACT

Please reach out to Tian for teaming inquiries. Both Tian and Daniel can answer your questions about OTOT digital modernization, transformation, and strategy capabilities. Daniel also specializes in health informatics and can field inquiries related to clinical data and processes. Reach out to Peter for inquiries about RPA, as well as web and mobile development.
